

Welcome...

Welcome to the annual Millar Angus production sale. 2010 proved to be a great year with ample moisture, grass, plenty of hay and a record setting cattle market. It's never a dull moment around our house as Ryle, our energetic 4 year old is always ready to go check cows or feed bulls with dad. Kobi is never far behind as she loves to try and keep up with her big brother.

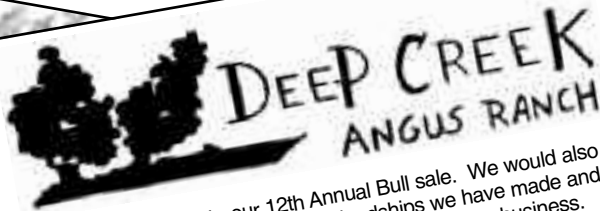

Now let's talk Angus cattle! As you take the time to evaluate this years offering of bulls you will find this to be one of the best sets we have offered for sale. These bulls will add performance, length, thickness, carcass qualities and maternal strengths to your herd. The goal for our operation is to produce cattle that will help the commercial cattle industry be as economical and profitable as possible. With the cattle market reaching new levels, there has never been a better time to step up the quality of genetics in your herd. We are proud to say we have seen many of our customers experience increased weaning weights off the cow and substantial gains in feedlot performance. With the track record we have seen our genetics produce we are confident these bulls will add those ever so valuable pounds and performance to your herd.

If you're looking for an older bull to cover more country one of our virgin two-year olds should fit the bill. They are bulls from our 2009 calf crop that were held back to grow out and develop. These bulls were raised with the rancher in mind: natural growth bred in, not fed on! We invite you to stop by to view our bulls and cow herd at anytime, we love to talk cattle! As always, we will take the bulls back home, keep them until April and deliver them, free of charge. The bulls will be semen tested in March. Scrotal measurements and ultrasound data will be available sale day. As always, the bulls sell FULLY GUARANTEED for the first breeding season with your satisfaction being our #1 priority.

As we look back on the past year, we extend a sincere thank you to all our past customers who have shown an interest in our program and are responsible for our success. It is folks like you that allow us to do what we love. We hope to earn your business here at Millar Angus where we may not be the biggest, but we're striving to be one of the best.

We look forward to visiting with you!

Jon & Breezy Miller
Jon, Breezy, Ryle & Kobi

Cattlemen and Friends,

We would like to extend a personal invitation and welcome you to our 12th Annual Bull sale. We would also like to take this chance to thank all of our past bidders and buyers. We cherish the friendships we have made and truly appreciate your support and confidence in our program and will continue to earn and keep your business.

2010 proved to never have a dull moment. With ample moisture, came plenty of grass and lots of hay to put up. It proved to be a full time job just trying to stay ahead of the grasshoppers. Dylan, 8, is becoming quite the ranch hand. Always willing to lend a hand and help. Kori, started kindergarten this year and is a big help for mom around the house. The biggest moment came when we added a little herd bull to our family on December 3, with the birth of our son, Tyler Ranch.

We are extremely proud of this years set of bulls and feel they are one of the most complete and best sets we have offered to date. They are wide topped, deep bodied, long and most importantly maternally strong. Backed by proven efficient females. With production costs continuing to rise, efficiency is a must. The average \$EN of the sale bulls is over 3 times that of all non-parent bulls. That's real value to your calf crop and money in your pocket.

We would love to have you visit the ranch so you can see the bulls and cow herd in their working environment. If you need any further information or have any questions, please contact us. For your convenience the bulls will be in Philip on Monday, February 21 and can be viewed up until sale time. Come early and stay late, we love to visit. As always, we will keep the bulls free of charge until May, semen test and give them their spring shots and deliver them to your ranch. Be assured that we do everything possible to ensure the success of the bulls. From the time they hit the ground until they hit the breeding pasture we condition them to be successful. The bulls sell Fully Guaranteed for the first breeding season. WE ARE SERIOUS ABOUT SERVICE! We look forward to visiting with you in the future and seeing you at the sale.

Thanks Again,

T.J. & Jeanine Gabriel

DVAuction.com

Terms: The terms of the sale are cash or check payable at the sale facility unless satisfactory credit arrangements have been made prior to the sale. The right of property shall not pass until after settlement is made. All settlements must be made with the clerks of the sale before any cattle will be released.

Bids: Every animal is to be sold and will be sold. No by-bidding is permitted. The highest bidder is the buyer.

Disputes: In case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters is final.

Announcements: Errors discovered in the catalog will be corrected by announcements from the auction stand at sale time and will take precedence over the printed material in the catalog.

Accidents & Liabilities: All persons attend the sale at their own risk and the seller and sales management assume no liability, legal or otherwise, for any accidents occurring in, on, or about the premises. The buyer must look to the seller for fulfillment of all guarantees and representations made hereunder.

Herd Health

We weaned the bulls on September 5th with ground hay, 2 lbs. of cracked corn and distillers grain. The bulls were transitioned over to a mixed ration of earlage, distillers grain, QLF, sudan silage and ground hay where we targeted a 3lb/day gain. The bulls were slowly stepped up to a 46 mg cal. ration which consisted of 12 lbs. earlage, 2 1/2 lbs. distillers grain, 3/4 lb. QLF and 16 lbs. ground hay and silage. We like to keep the bulls on a high roughage diet and grow them out to ensure sound feet, legs and longevity of the bulls.

Branding Time: Titervac 5+ PHM

Weaning Time: Nasalgen IP • Presponse HM
Vision 7/Somubac • Express 5
Poured with Ivomec

Spring Turn-Out: Preg Guard Gold 10
2 Footrot Shots • Poured with Ivomec

The bulls were weaned on September 21st. They were started on CHS Payback Bull Challenger 14% and free choice hay. They are slowly worked up to their full ration by the 1st of December. The bulls are growed up, not fed up and are fed in a 10 acre lot for exercise and development. I bucket feed the bulls twice a day, so I get to walk through them everyday.

• Bismarck is a unique and proven calving ease sire representing an outcross pedigree. He is gaining widespread popularity for his impressive low birth weight progeny who display exceptional structure, appealing muscle and shape. Bismarck scanned a 365-day REA of 16.0 inches for a ratio of 111. He combines all of the elements of EPDs, performance, cow family and phenotype to be a major contributor to the future of the beef cattle industry.
